

Beyond Enterprise (BE) is delighted to announce the successful completion of a 2-month collaboration with comitFS on behalf of a leading global financial services' client.

BE provided programme and technical support to an evaluation of voice surveillance technology, based on its [Accelerated RFP](#) approach. This agile methodology was applied to 3 vendors and included full on-premises testing and evaluation in the comitFS labs.

“The evaluation of speech recognition is becoming more frequent on behalf of our FinServ clients seeking effective Communications Surveillance but this programme was a particular challenge. The technical team at comitFS were superb and enabled us to run multiple tests on prepared hardware, using pre-scripted scoring tools. The evaluation included 2 new entrants to the Compliance Surveillance market. We hit our targets in terms of time, quality and clear direction to the client for their product development plans” – Simon Lewis, Senior Technologist, Beyond Enterprise

The entire exercise was completed to challenging deadlines set by the client, within 6 weeks. This included scoring over 300 transcripts and related outputs, mined from a wide variety of speech recordings and scenarios.

“The collaboration with BE has been immensely successful and bodes well for future projects. The client is particularly pleased with the depth and quality of the final report. A great result.” – Jappy Takhar, Managing Director, comitFS

Beyond Enterprise are an independent advisory company that acts as a trusted advisor to financial services companies. We **Identify** and **Reduce** the Risks of Regulated Voice Communications within an organisation. We help businesses prepare for MiFID II with a rigorous, independent assessment of existing voice compliance. It includes a full check of key areas, a risk analysis with recommendations, a score against 'best-practice' and an industry benchmark comparison. - <http://www.beyond-enterprise.co.uk>
